

Modern Packaging

GENERAL ALPHABETICAL INDEX

of articles, departments and subjects published in

VOLUME 42

January through December 1969

HOW TO USE THIS INDEX

Here are tips on how best to use this index. It is arranged alphabetically by major subjects of packaging interest and by company names. Under each subhead are the titles of all articles and departments of Volume 42 that deal with that particular subject. Additional subheads are used to cross-index subjects where two or more terms have similar meanings. On technical and engineering subjects, you may also want to consult the "Author's Index" on the last page.

All names of packaging and supplier companies are listed alphabetically, flush with the left side of the column. Indented below each company name are articles and important department items involving that particular company.
